

IMPORTANT SAFETY INSTRUCTIONS AND WARNINGS
For LITHIUM POLYMER BATTERIES

- You must read these safety instructions and warnings before using or charging your batteries.
- ***Lithium Polymer(LiPo) batteries are volatile.*** Failure to read and follow the below instructions may result in fire, personal injury and damage to property if charged or used improperly.
- LiPo battery & packs may explode and cause fire if misuse or defective. We require all LiPo batteries & packs buyers must be professionals and have capability to handle emergency.
- **By purchasing LiPo battery, the buyer assumes all risks associated with LiPo batteries. If you do not agree with these conditions, please consider NiMH or NiCd battery or return the battery immediately before use.**
- Must keep LiPo battery pack away from children.
- Test battery properties is your own responsibility. Please test LiPo battery you bought from us before using or sell to your customer to ensure battery can be operated properly and safely in your device.
- **We DO NOT responsible for any damages and consequences damages caused by misusing and modified battery pack.**

Initial Use.

LiPo batteries are supplied partly charged. Fully charge before first use.

Next Use

Avoid frequent full discharges because this puts additional strain on the battery. Several partial discharges with frequent recharges are better for LiPos than one deep one. Recharging a partially charged LiPos do not cause harm. Short battery life is mainly caused by heat rather than charge/discharge patterns.
